01 Introduction

Thank you for purchasing Sunlike Pro Urban Lighting Products.

Introduction

The high-performance Sunlike 30 Pro is a municipal-grade solar outdoor lighting system that provides bright off-grid light. This heavy-duty commercial dedicated series is ideal for city streets, parking lots, area lighting, and security lighting. It comes in a wide choice of configurations, lighting outputs, and recommended pole heights. The Sunlike 30 pro is optimized to provide years of bright, reliable light. Industry-leading efficiency, dense batteries, and advanced controls to guarantee the highest possible off-grid autonomy.

Important

In order to avoid deep discharge of the battery during storage, please fully recharge your battery every 4 months. Please make sure that the light is installed in an area with sufficient sunlight irradiance. A strict minimum of 3.5 hours/day of sunshine on average is recommended. Select the right operating mode according to the local legislation needs and the local sunshine conditions. Keep it away from shadows. Self-cleaning available when the light fixture have minimum angle of 15 degrees.

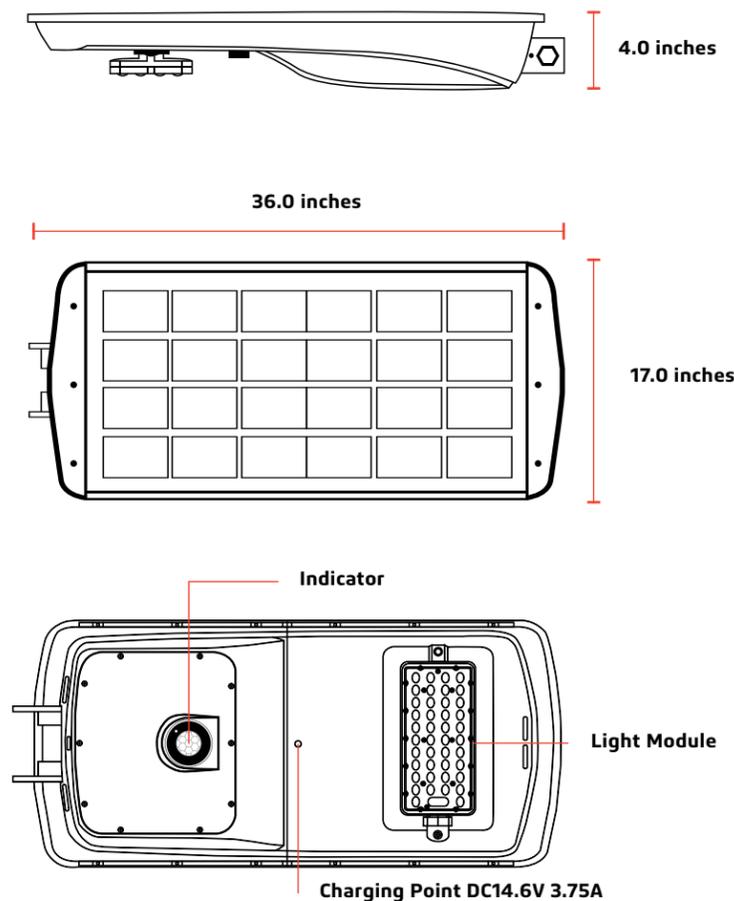

Please save these instructions. Read all of the instructions carefully before attempting to carry out any installation or wiring. Do not open or attempt to repair the product on your own, as it may cause serious damage and would void the product warranty. Contact your local distributor for any questions concerning the installation.

Range of the light module on the lighting fixture is 20–26 feet (6–8 meters). The ideal installation spacing is >16 feet (5 meters). When installing two or more lighting fixtures on one pole, select desired operating mode before installation. Interference can cause delay or malfunction when using the remote control to change operating modes after installation.

Precautions when working with solar panels

When the solar panel is exposed to sunlight, a voltage appears at the output terminals of the solar panel turning it into a source of electricity. To avoid a shock hazard, make sure the solar panel is covered with an opaque (dark) layer such as paper or cloth during the installation. Do not make contact with the terminals when the panel is exposed to sunlight or any other light source.

Sunlike 30W PRO

02 Specification

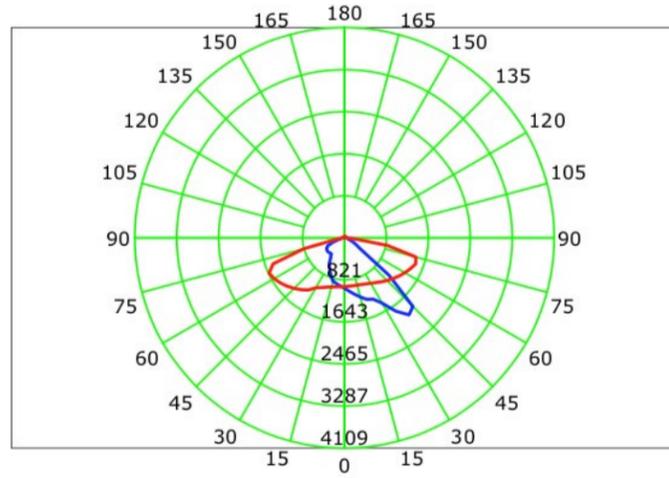

Specification	Sunlike 30W PRO
LED Nominal Power	30W
Solar Panel	18V 52W
LiFePO ₄ Battery	12.8V 25AH Superior Battery
Weight	47.1 lbs
Lumen Output@5000K	6000
EPA	6.26
Waterproof Rate	IP65
CRI	> 70
Casting	Aluminum
Efficiency@5000K	200 lm/W
LED Chip	Lumileds 5050 (215lm-CR>70)
* Charging Time	7hrs
Run Time (@Full Power)	11hrs
Operation Mode	Remote control and One-key Setting
Installation Height	9 to 20ft
* Operating Temperature	-40 °F to 140 °F
* Charging Temperature	-58 °F to 140 °F
Maximum Autonomy	
Motion Sensor Mode	40%–100% 25hrs 20%–80% 50hrs
Time Control Mode	Night Owl 23hrs Early Bird 20hrs
Constant Mode	100% 11hrs 70% 15hrs 40% 26hrs

* The temperature can impact the battery's charging and normal operation.

* The solar charge time data is based on 77 degree F ambient temperature with the panel pointed directly at the solar radiation. The standard radiation value is 1000W/m².

03 Luminous Distribution

Sunlike Pro 30W Type III

04 Battery Notes

1. Super Capacitor battery powered Sunlike Pro lights are visibly brighter than other outdoor solar lights, and their performance overall is more reliable.
2. To charge the battery fully may take up 6 to 12 hours.
3. The rechargeable battery can work continuously for 10 hours at full power.
4. Output will be reduced to 40% when the battery is below 40% of its capacity.
5. Battery will stop charging when the ambient temperature is below -58°F or above 140°F.

ATTENTION

Battery cannot be replaced on your own. Please contact SOLTECH for any battery's questions.

After opening the Sunlike 30W Pro, package, you will notice that the solar panel is covered, and the indicator is flashing every 5 seconds. It signifies that the fixture is in open circuit mode. Once the fixture is taken out of the package, and the solar panel is no longer covered, the Sunlike 30W Pro will automatically turn on, and the indicator will begin flashing every 2.5 seconds. The light head will then turn on for 1 minute and then shut off again. It means the fixture is switching from open circuit mode to standard working mode.

If you wish to shut off the light, you must first cover the solar panel. Then press the off button on the remote. You can also just press the off button to turn off the lights during the night. When the solar panel detects light, the fixture will activate and resume normal operation again.

Battery Status is indicated by the red indicator on the lighting fixture as follows:

- > Slow red light flashing (Every 2.5s) = Working
- > Slow red flashing (Every 5s) = Open circuit
- > Red light continuously on = Non-working
- > Quick red flashing (Every 0.5s) = Charge fault
- > Quick red flashing (Every 0.1s) = Over current or Short circuit

Storage

To avoid over discharge of the battery during storage, please recharge the lighting fixture every 4 months. Use the dedicated charger to charge, reset the switch when done.

(IAP) Intelligent Adaptive Program Battery Control Technology

In order to extend the off-grid autonomy of the Sunlike Pro under shady trees, heavy rain, and thick clouds, our controllers now integrate an adaptive smart control feature to actively track battery capacity and adjust light output accordingly. Before integrating this feature, selecting a light output percentage on the remote would yield an accurate percentage of max LED brightness. Now with (IAP), the controller actively monitors the battery and regulates the electrical current to the LEDs. The controller makes light output of the selected percentage on the remote relative to battery capacity rather than max LED output. This smart-control feature can increase our off-grid performance by up to 40%.

05 Installation and Wiring Compliance

1. Installation and wiring must comply with the State and National Electrical Codes.
2. The Sunlike 30W Pro model is intended for outdoor use only and should not be installed in an unventilated area, and shall be installed in an environment within the operational temperatures defined for the product.
3. The average sunshine in the installation area should be above 3.5 hours/day in order to ensure full function of the lighting fixture. Avoid areas with shades.
4. Before installation, if applicable, please ensure the light pole and its foundation are solid enough to withstand the lighting fixture(s).
5. Before installation, please ensure that the battery is fully charged. Install during sunny days if possible.
6. Before installation, please press the ON/OFF key in the remote control and check whether it shows a red light on the indicator. Please cover the panel and check if the light module turns on normally within 1 minute.

After Installation

The lighting fixture will automatically turn on at night and turn off during daylight.

Important

Always orient the solar panel facing the equator (e.g. facing south if in northern hemisphere).
Always have a tilt angle of at least 15° to avoid dust accumulation (0°=horizontal plane).

Ordering Information Chart

Series	Wattage	Color Temperature	Mounting Options	Finish
STLSTC=Sunlike Pro	30=30W 6000 Lumens	X=3=3000K X=4=4000K X=5=5000K X=6=5700K	YY=WM=Wall Mount YY=TRR=Trunnion Round YY=TRS=Trunnion Square YY=SF=Slip Fitter YY=SA=Straight Arm	ZZ=GY=Gray ZZ=BZ=Bronze

Sample Number: STLSTC30XYZZPRO

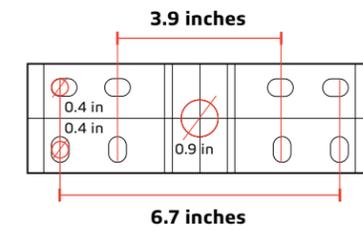

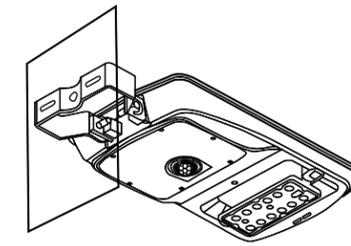

For example: STLSTC303TRSGYPRO

This means the customer wants a Sunlike Pro 30 watt, 3000K CCT, wall mount installation, with a gray finish.

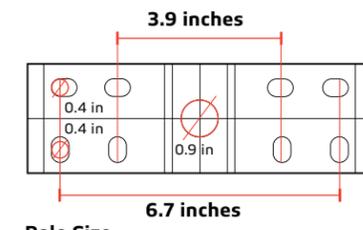

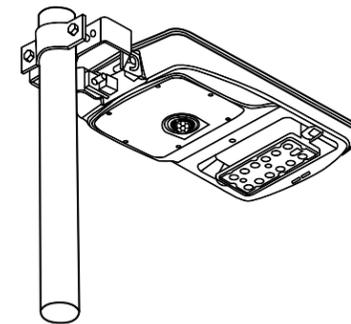

DO NOT send the sample number directly to our salers. Use the information in the chart above to create a model number with the correct series, wattage, temperature, mounting option, and finish for the product that you want.

06 Mounting Accessories

A. TRUNNION—Wall Mount

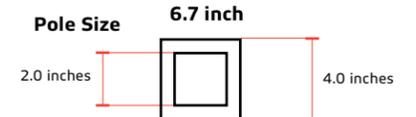

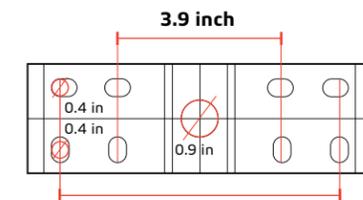

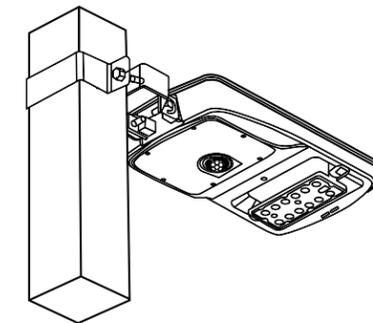

A-b. STLSTC-TRS-30W Pro (for Sunlike 30W Pro)

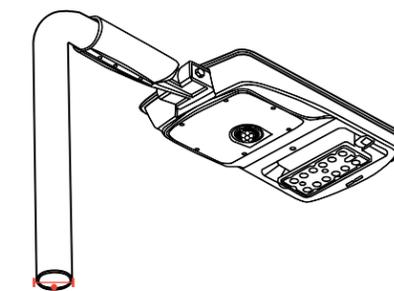

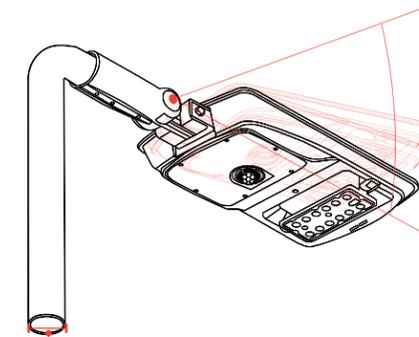

B-b. STLSTC-TRR-30W Pro (for Sunlike 30W Pro) works with 2.0 inches to 4.7 inches poles.

C. TRUNNION—Square

C-b. SLSTC-TRS-30W Pro (for Sunlike 30W Pro) works with 2.0 inches to 4.0 inches poles.

D. SLIP FITTER—Rotative AND STRAIGHT ARM

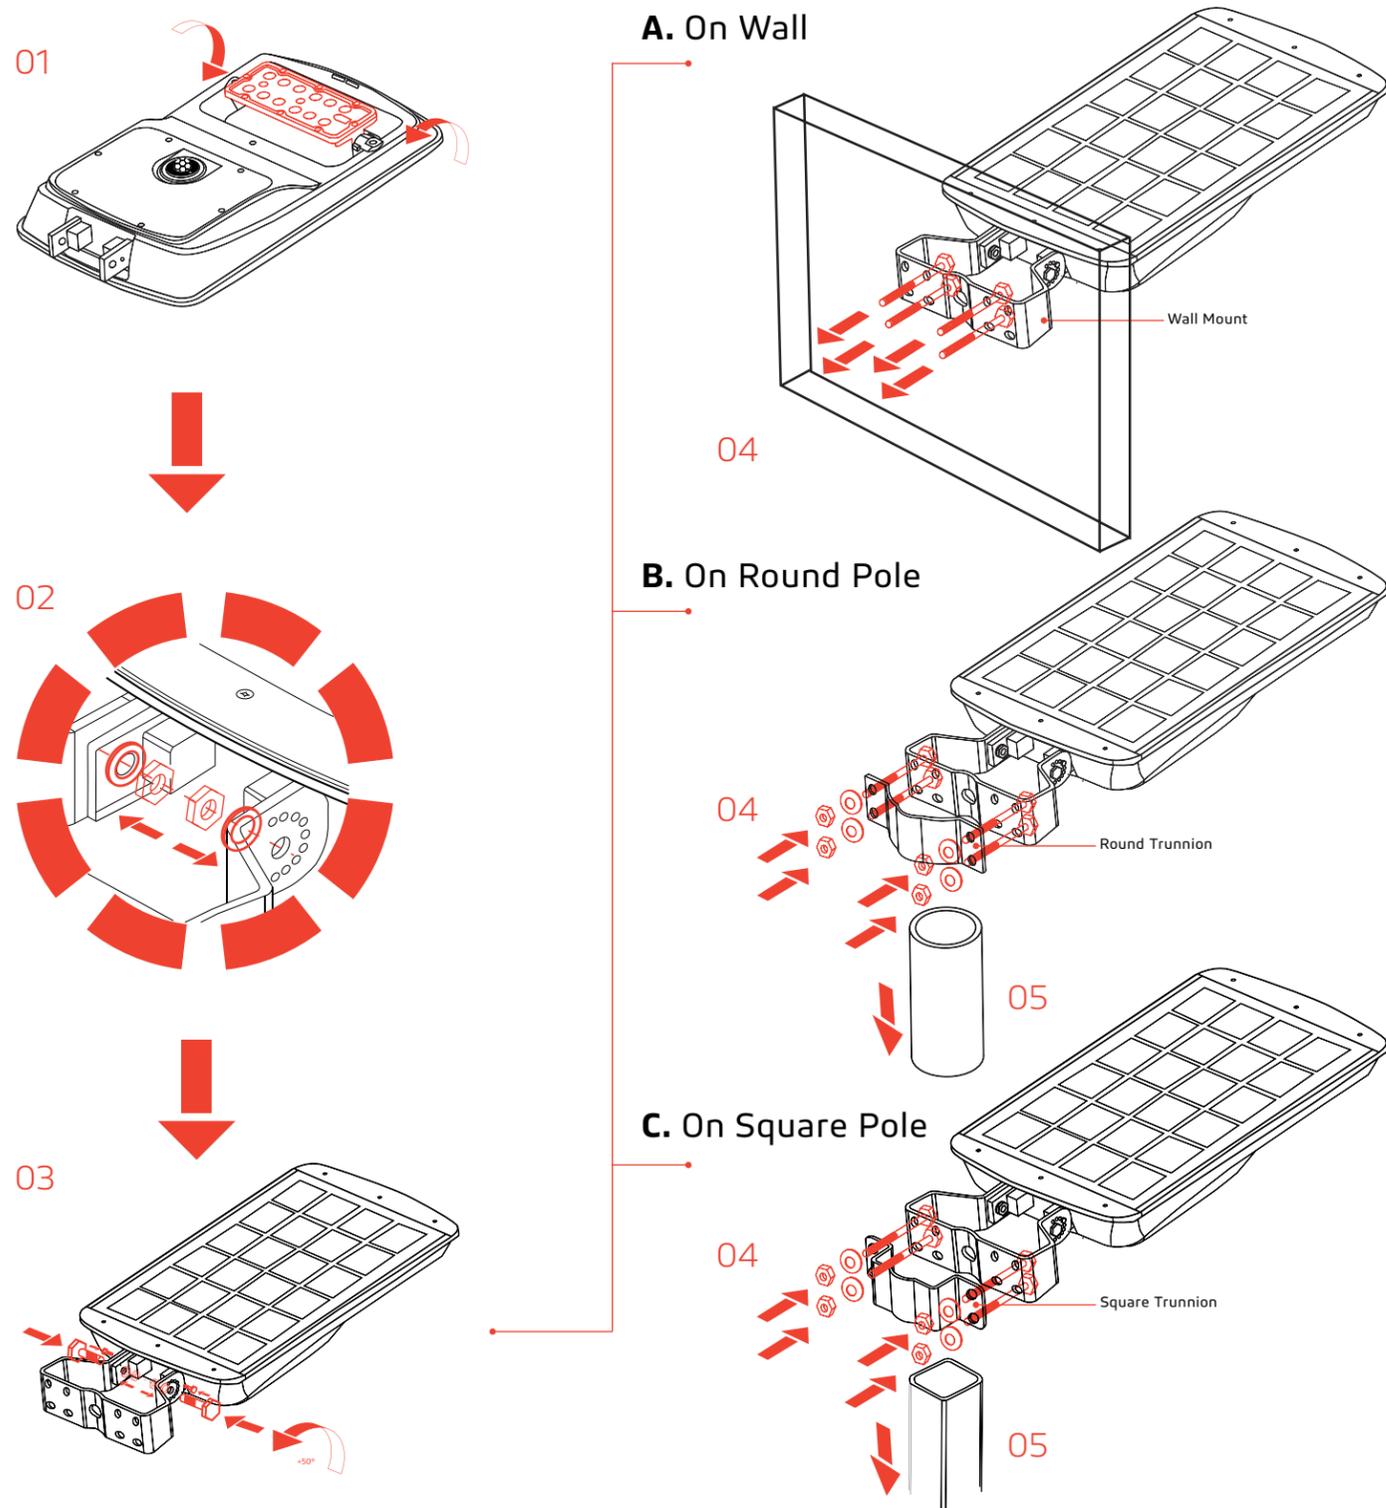

Pole Size For Slip Fitter And Straight Arm

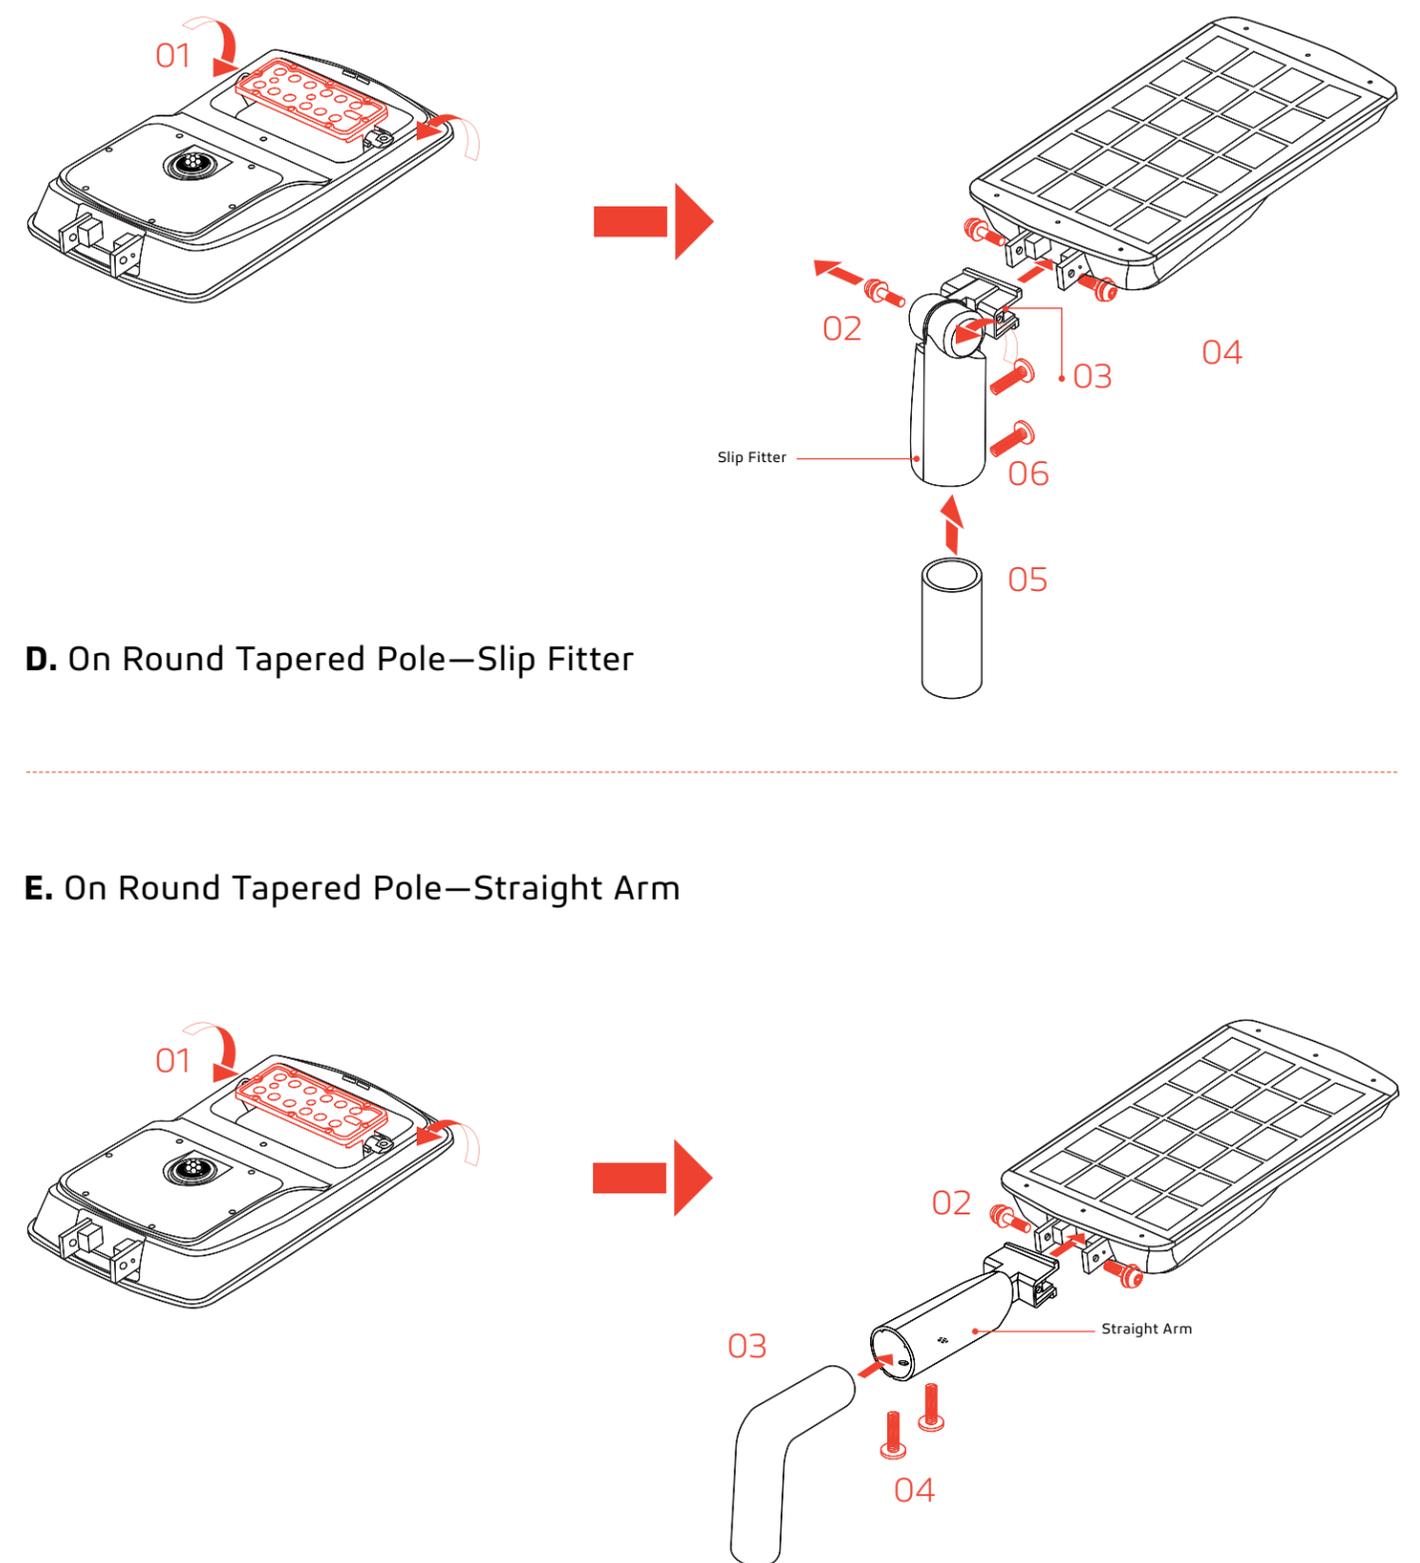

07 Installation

Trunnion Mount

Slip Fitter and Straight Arm

09 Panel Angle

The Solar charge in a battery pack won't last forever. The off-grid system relies on stored solar energy for autonomy. Angling your solar panels properly can boost the power intake of your solar lighting system. You want to angle your solar panels at a tilt based on the area's latitude.

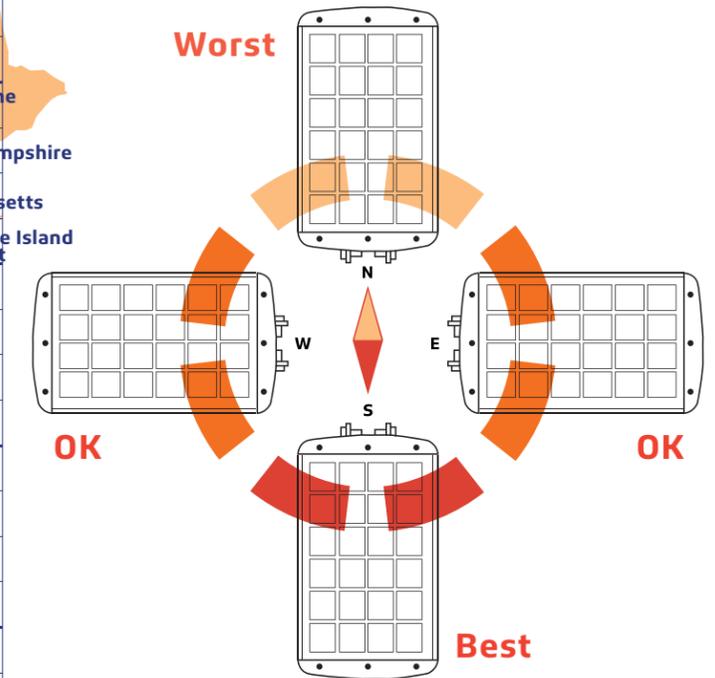

Tip

You can increase the tilt 15° in the winter or decrease 15° in the summer. In this way you can get the maximum sunlight to recharge the battery bank.

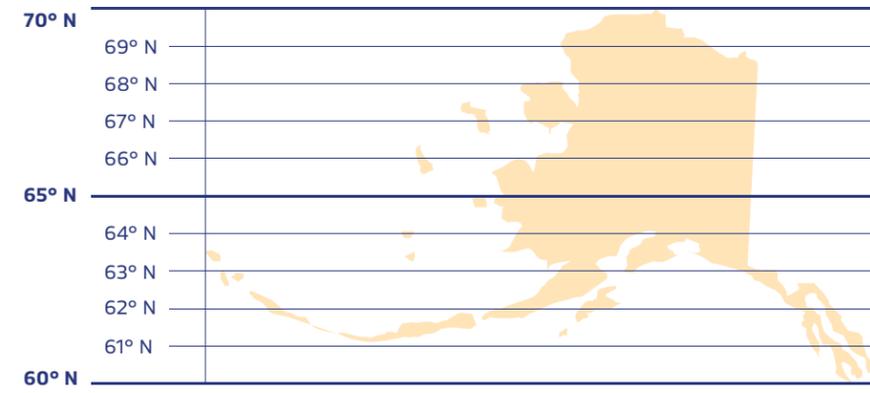

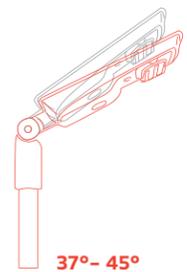

Key

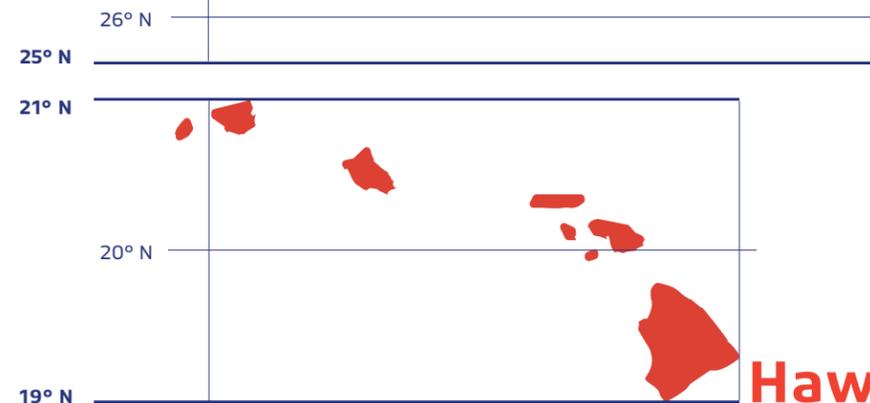

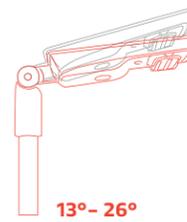

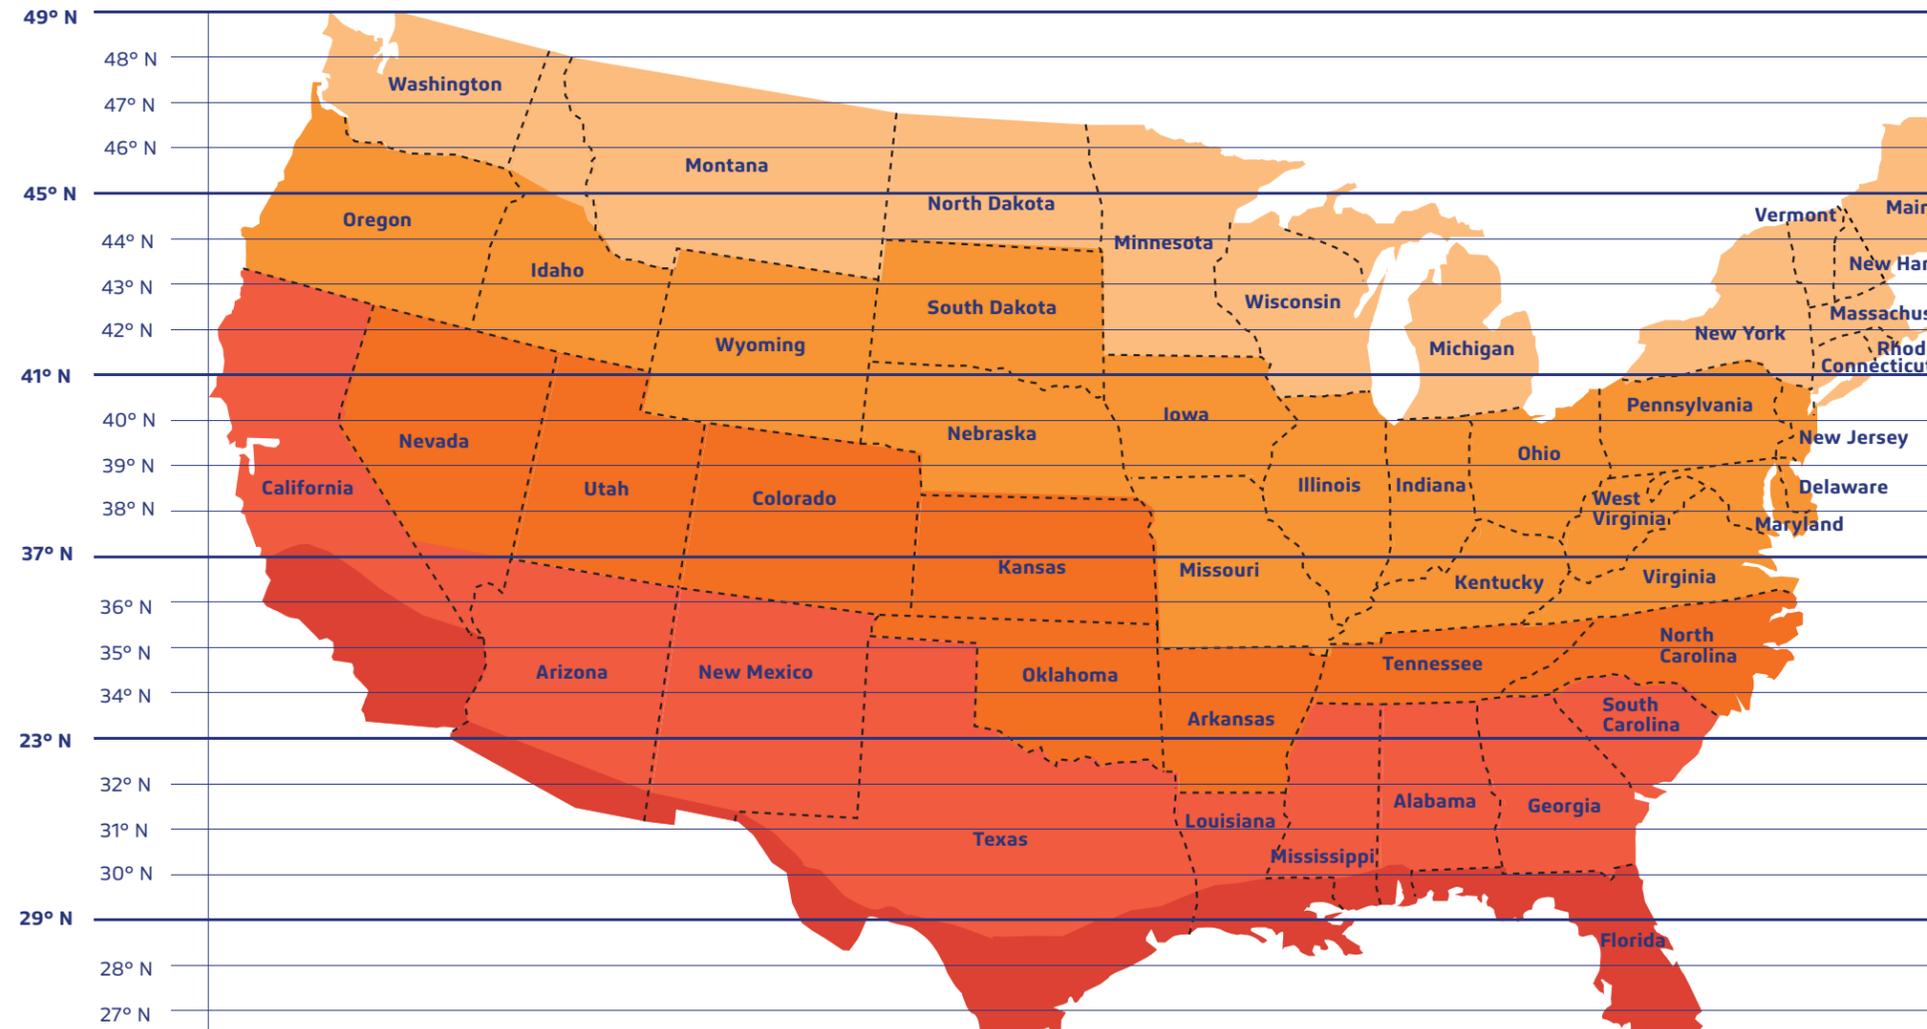

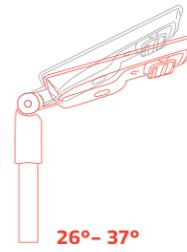

Best Facing Direction For The Solar Panel

The area will dictate the installation of the fixtures and will sometimes prevent the lights from facing south. But that's okay! Panels facing West & East won't get as much light as Southern facing panels, but will still collect a good amount of sunlight. A North facing panel also works, but it will take longer to charge than any other direction. This would mean that the solar charge will be less optimal if installations are facing North.

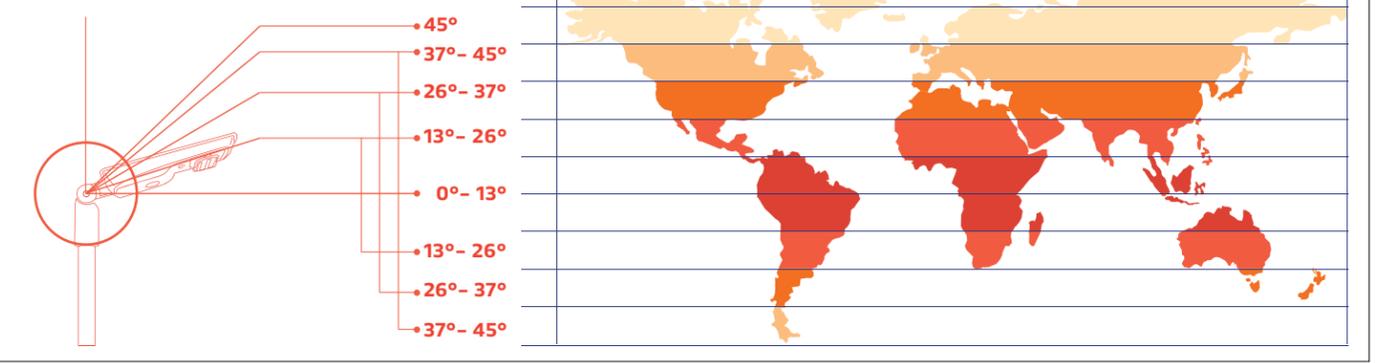

Alaska

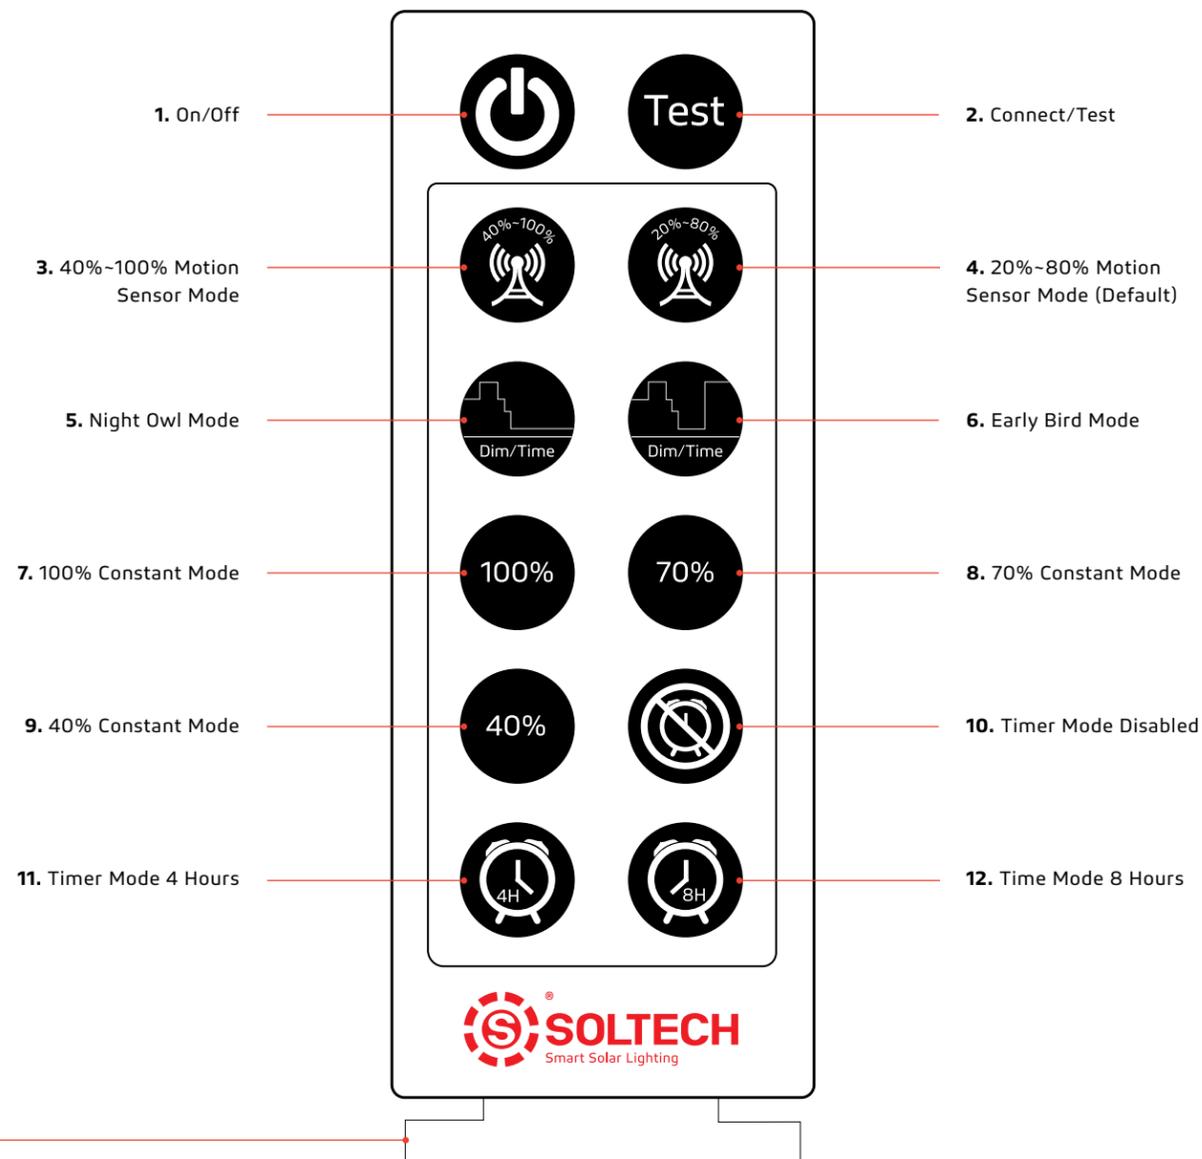

Hawaii

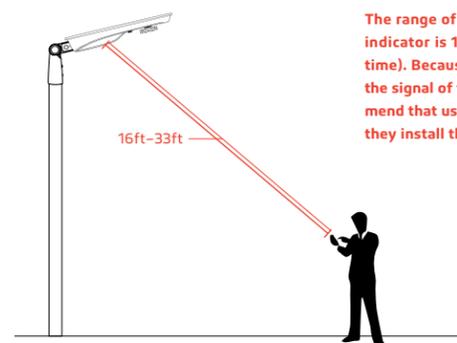

World Wide Panel Angles

09 Remote Control Guide

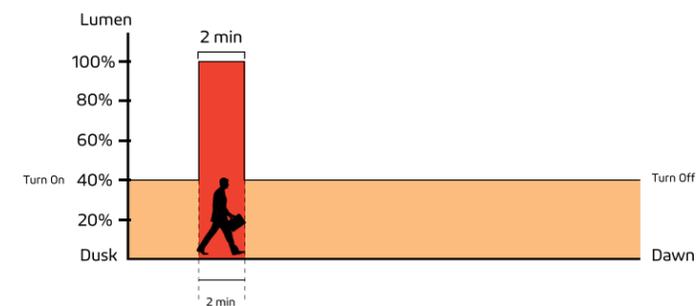

When using the remote for the first time, please remove the plastic piece at the bottom to make the remote turn on.

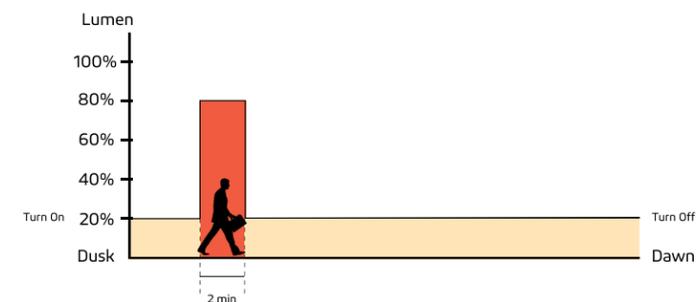

The range of the remote control to the indicator is 16ft (Day time) to 33ft (Night time). Because the sunlight will impact the signal of the remote control, we recommend that users setup the mode before they install the light.

- 1. On/Off**
When off is selected, the light will stop working. The solar panel will not charge the battery and the battery will not supply electricity to the light.
- 2. Connect/Test**
Remote control device can be connected with any lighting fixture, one at a time. To connect, press the button once. It also functions as a test button. To test, press the "Test" button once, the red light will indicate the fixture is charging, green light indicates that the fixture is operating. Testing lasts for 10 seconds, and then it goes back to the mode previously in use.

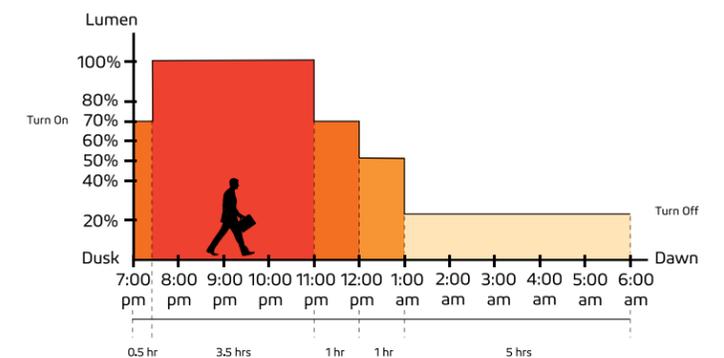

3. 40%-100% Motion Sensor Mode
Constant 40% brightness (turns on at dusk, turns off at dawn); 100% brightness turns on for 2 minutes when motion is detected.

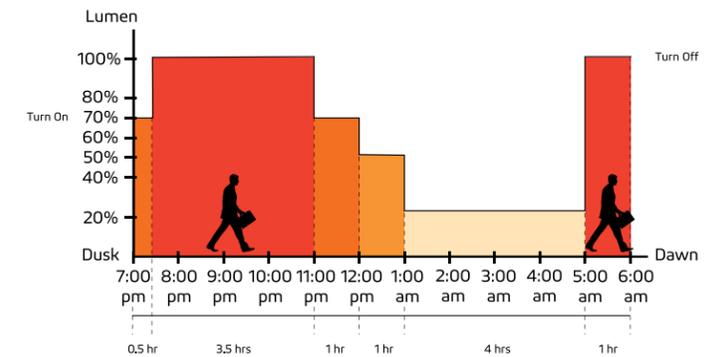

4. 20%-80% Motion Sensor Mode (Default)
Constant 20% brightness (turns on at dusk, turns off at dawn); 80% brightness turns on for 2 minutes when motion is detected.

5. Night Owl Mode
Changes as natural light decreases/increases (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 5 hours (turns off at Dawn).

6. Early Bird Mode
Changes as natural light decreases/increases with increased brightness near dawn for early risers (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 4 hours, 100% brightness for 1 hour (turns off at Dawn).

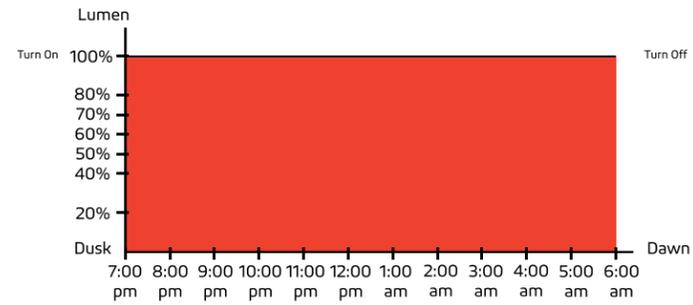

(IAP) Intelligent Adaptive Program Battery Control Technology
In order to extend the off-grid autonomy of the SUNLIKE 50W under shady trees, heavy rain, and thick clouds, our controllers now integrate an adaptive smart control feature to actively track battery capacity and adjust light output accordingly. Prior to including this feature, selecting a light output percentage on the remote determined the constant percentage of max LED brightness. Now with (IAP), the controller actively monitors the battery and regulates the electrical current to the LEDs. The controller now applies the selected percentage output on the remote to the battery capacity, rather than the max LED output. This smart-control feature can increase our off-grid performance by up to 40%.

Important
Dust and dawn time can vary for different locations and seasons. The sensors in our products will monitor the light levels where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes.

09 Remote Control Guide

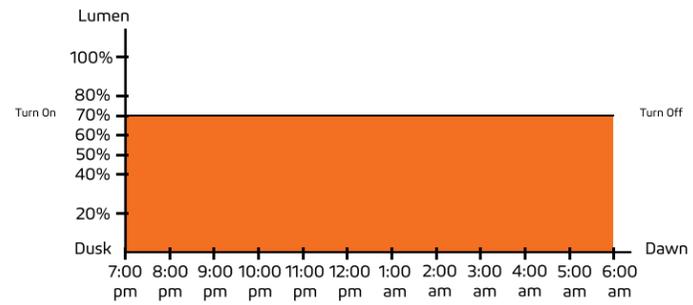

7. 100% Constant Mode

100% brightness from dusk to dawn.

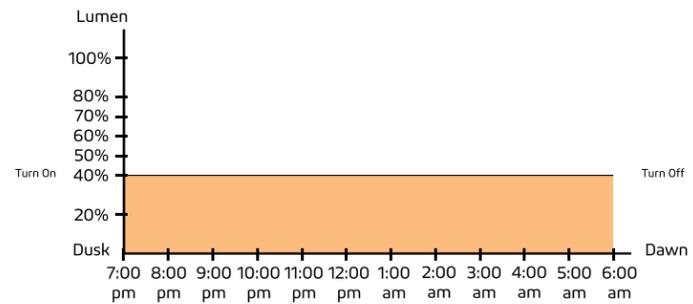

8. 70% Constant Mode

70% brightness from dusk to dawn.

9. 40% Constant Mode

40% brightness from dusk to dawn.

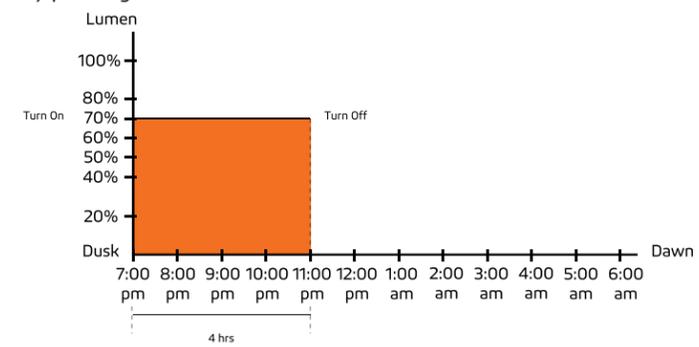

10. Timer Mode Disabled

Press this button to turn off Timer Mode; settings revert back to before Timer Mode was last activated.

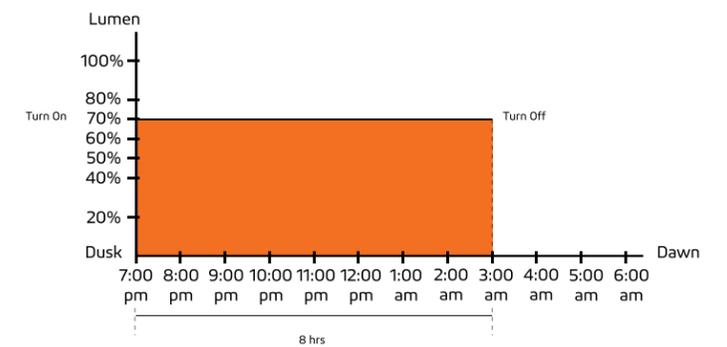

11. Timer Mode 4 Hours

This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 11pm. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

12. Time Mode 8 Hours

This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 3am. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

Important

Dust and dawn time can vary for different locations and seasons. The sensors in our products will monitor the light levels where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes.

Sunlike products are covered by a 5 year limited warranty. Unlike urban light warrants to the original purchaser that this product is free from defects in materials and workmanship for the period of 5 years from date of purchase. To obtain warranty service please contact your local distributor or sales rep for further instruction.
