4. Mount the lamp onto any wall surface or lamp post.

B: Stand On Flat Surface

1. Prepare lamp, accessories, and tools.
2. Use the allen wrench to loosen the bracket

04

OPERATING MODES

Press the power button then program the operating mode. Charge for 6 hours to get 3-4 nights of light.

Power Button

Press the ON/OFF button, the lamp will automatically turn to Sensor mode. If you press down on the button for 3 seconds, the lamp will flash one time and change to Constant Lighting mode.

When battery capacity is above 30%

Automatically turns on to full brightness (500LM) when motion is detected in the range <19.7ft then dims down in brightness after 20 seconds of no motion.

When battery capacity is below 30%

Automatically turns on to full brightness (500LM) when motion is detected in the range <19.7ft, then turns off after 20 seconds of no motion.

CONSTANT MODE

Press the On/Off button for 3 seconds to activate constant lighting mode. The light will flash one time to indicate the mode has been switched. Both motion and light sensors are disabled. The lamp will remain on constant lighting until the battery capacity reduces switching back to sensor mode.
